At DST Electric, we offer preventative maintenance agreements for most brands and sizes of generators.

The Importance of generator maintenance cannot be stressed enough, New England Weather and poor reliability of Utility Companies, requires your generator system be in Top shape year round.

Through use and over time, batteries, spark plugs, oil, fluids, belts and hoses begin to deteriorate, valve clearance, ignition timing, and frequency need to be adjusted. Regular maintenance is the only way to ensure your portable generator or standby generator system will perform when the power goes out.

BENEFITS OF OUR PREVENTATIVE MAINTENANCE AGREEMENTS

Prevent costly and inconvenient breakdowns. We will perform a thorough check of your entire generator to identify small problems before they become big problems.

Extend your generators life. By staying on top of your generator's maintenance, its service life can be considerably longer.

First Response / Priority Service. Our Preventative maintenance clients get first response over clients that do not have a preventative maintenance agreement. In the event of a system malfunction, you will be at the head of the line.

Discounted Repair Rates. Our PM clients enjoy discounted repair rates for the life of their agreement.

ANNUAL MAINTENANCE PERFORMED ON YOUR GENERATOR

1. Change lubrication oil
2. Replace oil filter
3. Replace spark plugs
4. Replace Air Filter
5. Check and adjust ignition timing, points, condenser
