

# Automatic Home Generator Systems

## Smaller and Smarter

Give your family the peace of mind that comes with knowing that if the power goes out, your lights will still be on.

The 8kW<sup>1</sup> Home Generator System by GE keeps the essentials powered in your home. The lights stay on. The refrigerator keeps things cold. The furnace keeps you toasty warm on a cold winter's night. The 10kW<sup>1</sup> standby generator provides enough power for more than just the essentials by managing appliances with Symphony II™ Power Management.

Our new 8kW<sup>1</sup>-10kW<sup>1</sup> has the smallest standby generator footprint of its class. Its compact design, convenient placement options and comprehensive warranty make it the best choice for homeowners with small properties.

Enjoy peace of mind from GE Generator Systems. The smart choice.

## Providing Peace of Mind

### Automatic

The system continuously monitors your home's connection to utility power. The generator starts automatically when there is an outage and shuts down automatically when utility power is restored.

### Premium Engine

Newly designed for standby applications, Briggs & Stratton engines deliver improved reliability, performance and durability to meet your power demands during a power outage.

### Comprehensive Warranty

We offer a comprehensive parts and labor, 4-year limited warranty<sup>2</sup>, so you can be assured of our commitment to quality. And your pocketbook.

## Designed Around Your Life

### Smallest Standby Generator

Featuring a new space-saving design, the compact 8kW<sup>1</sup> has the smallest standby generator footprint of its class. Its unobtrusive design makes it a perfect fit for homeowners with small properties.

### Convenient Placement Options

Our 8kW<sup>1</sup> - 10kW<sup>1</sup> standby generators can be placed as close as 18" from the home in accordance with National Fire Protection Agency testing standard<sup>3</sup>. Our 8kW<sup>1</sup>-10kW<sup>1</sup> standby generator is the best choice for homeowners with tight lot lines.

### Easy Monitoring

Each generator system comes with a wireless monitor for inside your home, so you know your generator is working without ever having to go outside.

Not intended for use in prime power or critical life support applications.

<sup>1</sup> This generator is rated in accordance with UL (Underwriters Laboratories) 2200 (stationary engine generator assemblies) and CSA (Canadian Standards Association) standard C22.2 No. 100-04 (motors and generators)

<sup>2</sup> Warranty details available at [ge.com/generatorsystems](http://ge.com/generatorsystems)

<sup>3</sup> Installations must strictly comply with all applicable codes, industry standards, laws, regulations and provided installation manual. Running engines give off carbon monoxide, an odorless, colorless, poisonous gas so it is important to keep exhaust gas away from any windows, doors, ventilation intakes or crawl spaces. The installation manual contains specific instructions related to generator placement in addition to NFPA 37, including the requirement that carbon monoxide detectors be installed and maintained in your home

<sup>4</sup> Fuel consumption rates are estimated based on normal operating conditions at ½ load. Generator operation may be greatly affected by elevation and the cycling operation of multiple electrical appliances – fuel flow rates may vary depending on these factors.
